

Build-a-Wedding Ring Quilt

Designs by:
Jackie Poletti

The columns of circular pieces (blocks) can be as long as you wish to create a wall hanging, table runner, topper, pillow (as shown), or even an entire quilt! Add embellishments if you wish to the intersections, and you have created a new masterpiece.

Anita Goodesign

Build-a-Wedding Ring Quilt

This set consists of 11 different circular pieces (referred to as “blocks”), each featuring a center motif, some with heart-themed applique and crazy quilt stitches, others with quilting in distinctive patterns, all with a rich satin edge. All designs measure 150.0mm x150.0mm (5.9” x 5.9” in inches)

Each is stitched on dissolvable stabilizer with batting or fleece, depending on your plan for the project's usage, and on 2 layers of fabric. The back fabric frames the motif, and the blocks join to form the scallop pattern on the finished project. The blocks are joined in the hoop to form columns, then the columns are sewn together to complete the project.
